Paper Prototypes

I couldn't decide which idea and format I should go for, therefore I decided to do my two paper prototypes on both my ideas to see what my peers in my class felt most feasible and well thought out after experiencing it as paper prototypes. The paper prototypes helped me decide on this paper prototype as I should be able to make it with some help and incorporating JSON arrays to organize my data. My users liked that information was displayed on one page, which makes it quick and easy way to get straight to the facts and that there were cstill features and compnents to explore and interact with. The next page was the other idea and format I thought of making, but I discovered after feedback, I wouldn't have enough time to turn this idea into fruitation even though it was also a great way to explore the idea of animals and biocreation/biosystems.

Card 1 (top-left):

How Important Am I?

'explore ~~diff~~ impt foodchains
in different habitats

[Enter]

Card 2 (top-right):

Marine Life

(plankton) —— (tuna) —— (shark)

Card 3 (middle-left):

How Imt am I?

Marine Life

(plankton) —— (tuna) —— (shark)

Mountain Life

( ) —— (deer) —— (mnt lion)

Card 4 (middle-right):

Marine Life

(P) —/ /— (T) —— (S)

Card 5 (bottom-left):
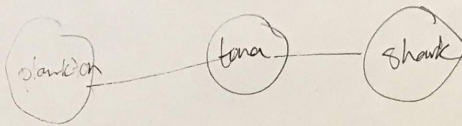

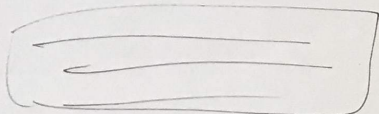

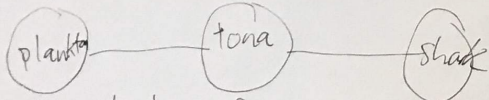

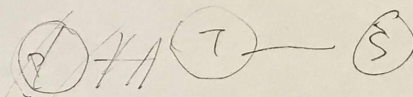

How Impt Am I

click on a species to
~~see how~~ learn o see
how it would effect its
habitat's food chain

Card 6 (bottom-middle):

(P) —/— (T) —— (S)
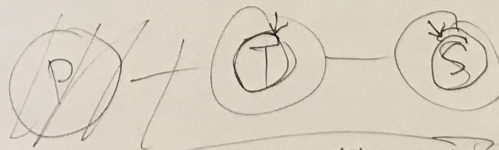

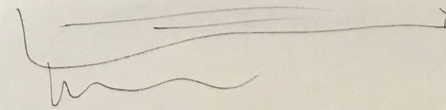

Plankton X — This is eating
Tuna ↑ — Plankton
Shark ↓ — can kill
this food chain
over time blc...

Card 7 (bottom-right):

Biosystems Are Important!

Marine Food Chain
click on a button to see ~~the~~ chain
~~it will effect~~ reaction of
~~of~~ a species
extinct

Plankton —— (tuna) —— (shark)
